

AUDAC ATE04

GENERAL FEATURES

- Speaker with line transformer – suitable for 100V system
- Suitable for walls and columns, quick and easy installation
- DC Blocking Card can be mounted into the speaker. (for line supervise)
- Black & white colour options
- ABS speaker

AUDAC ATE04 column type speaker is an imported product and produced as suitable for installation onto wall or column in case of no ceiling floor. This speaker which has been used especially in general sound and emergency announcement systems is produced as with line transformer that is suitable for 100V principle. Due to the fact that the speaker which has 3W-6W-12W-24W power options is two-way and tweeter, it is preferred in music broadcast applications.

AUDAC ATE04 and other transformer speakers are used in hotels, residents, hospitals, shopping malls, private and public schools, universities, prisons, court buildings, chain stores, factories, industrial facilities, mosques, praying halls, restaurants, cafes etc. in public address and voice alarm systems.
