

# AUDAC CHA230

## GENERAL FEATURES

- Horn type speaker- 100V air pressure
- Quick and easy installation onto walls and columns
- ABS body
- Standard white
- Water proof external type (IP:56 class protection)

AUDAC CHA230 horn type speaker with air pressure is produced as suitable for installation onto wall or column. This speaker which has been used especially in general sound and emergency announcement systems is produced as with line transformer that is suitable for 100V principle. In addition to that it is preferred in areas where the ambient noise is very high, it is also used to convey the sound to distant areas. The usage areas are especially mosques, factories, industrial facilities, open areas and many project areas.

AUDAC CHA230 and other transformer speakers are used in hotels, residents, hospitals, shopping malls, private and public schools, universities, prisons, court buildings, chain stores, factories, industrial facilities, mosques, praying halls, restaurants, cafes etc. in public address and voice alarm systems.
