

PASHA VOL

GENERAL FEATURES

- 6 stages volume setting in 100V constant voltage principle
- The protection against the misuse thanks to non-stop commutator
- The possibility to use recessed and plaster
- The opportunity to make announcement in maximum sound level thanks to the relay circuit
- Standard white colour

PASHA VOL series volume controller panels is used to configure the zonal sound level. These panels that have been produced as suitable for flush or surface mounted are produced as metal case in PASHA VOL 30W, 60W and 120W. There are different models of VOL series volume controller; local input and channel selector models.

PASHA VOL series volume controllers must be chosen as suitable for the total speaker power of application areas in general sound systems. These panels have 6 stages. The weakening stages of the setting panels are adjusted in dB as suitable for hearing level.

TECHNICAL SPECIFICATIONS

Input Voltage	100 Vrms
Input Cable	2-3-4 Core
Output Cable	2 Core
Output Power (Nominal)	30W - 60W - 120W
Volume Setting Stages	6 Stage
Operating Temperature	-10°C ~ 50°C
Storage Temperature	-30°C ~ 70°C
Dimensions	125 x 125 x 95cm
Weight
